1. Overview

BodyGuard is a safety tool that combines an alarm with a flashing light. It emits a siren and flashes light to ward off attackers and signal for help. BodyGuard is useful for mobile phone user who walks alone in the dark.

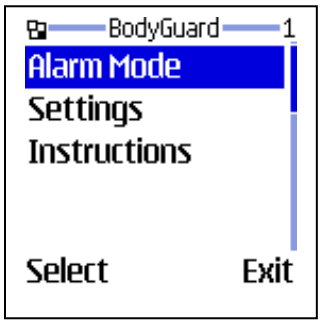
2. System Requirement

BodyGuard supports most of the Nokia Series 40 mobile phone models.

3. Getting Started

■ Main Menu

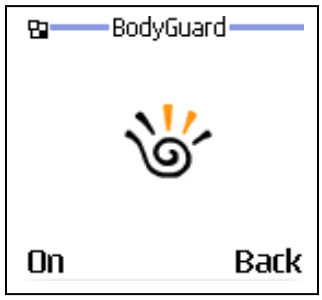
1. 'Main Menu' is shown after the application is launched.



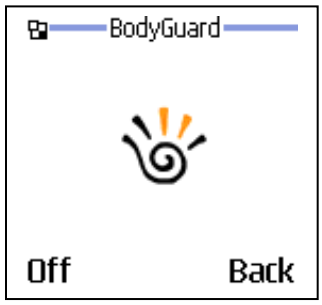
2. Scroll up and down to select functions.
3. Select **'Alarm Mode'** to get ready to turn on the alarm.
4. Select **'Settings'** to change the flash settings.
5. Select **'Instructions'** to view the instructions.

■ Alarm Mode

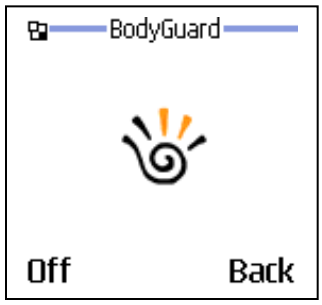
1. The Alarm Mode screen is shown when user chooses ‘Alarm Mode’ in the main menu. User should get ready in this mode when she/he feels threatened.



2. Press ‘On’ to start the alarm. When the alarm is on, the ‘On’ command is changed to ‘Off’. Press ‘Off’ to turn off the alarm.

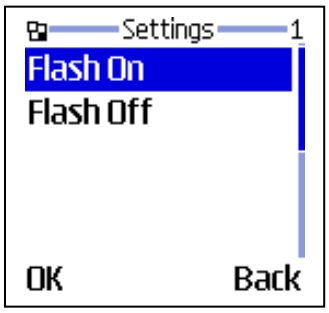


3. The screen will flash if the flash feature is set.



■ Settings

1. Select ‘Settings’ to turn flash feature ‘on’ and ‘off’.



■ Instructions

1. The **‘Instructions’** screen provides brief information on the instructions to use the application.

4. Important Information

1. BodyGuard only serves as a safety tool and does not guarantee the safety of its user.

2. The maximum volume of the siren depends on the maximum speaker output of the mobile devices. Thus, it may not be loud enough to ward off every attacker.

5. Point of Contact

Enquiries about the application can be sent to:
